Annual tuition fees for EU and EEA students:

- › **Bachelor Degree: 178€**

For students coming from outside the EU/EEA and more information concerning tuition fees, please consult our website (www.u-bordeaux.fr/en/tuition-fees)

Programme outline

The International Bachelor Degree Programme is an enhanced programme based on the existing scientific curriculum at the University of Bordeaux.

Scientific courses are given in English, students partake in an obligatory international mobility period and a choice of a minor degree programme is offered:

- › Biology
- › Biosourcing
- › Computer Science
- › Epistemology
- › Mathematics

Programme structure

Semester 1 & 2

- › Acquisition of general knowledge in the field.

Semester 3

- › Training period of six months in France or abroad (30 ECTS)

Semester 4

- › Acquisition of general knowledge in fundamental and practical chemistry (organic, inorganic and physical chemistry).

Semester 5 & 6

- › International mobility period.

Strengths

At least one scientific course per semester in English.

A complementary minor course online (mostly in English).

Transversal teaching in Artificial Intelligence (in English).

Optional modules on inter-cultural competencies.

International activities (meetings with international researchers and students).

One semester or one year abroad in another university among the partners of the University of Bordeaux.

→ And after?

- › With this degree, students may apply for international Master programmes (Msc) in Science and Technology, in particular those offered by the University of Bordeaux.

How to apply?

Students who have passed the "baccalauréat" (French equivalent of the High School diploma / A-levels) may apply to the International Bachelor Degree Programme.

A total of 12 students are admitted to the six major subjects. Selection is carried out according to school results as well as a cover letter.

- › This selection procedure does not replace the "Post-baccalauréat" application procedure (Parcoursup).
